

Cordless surface shaver

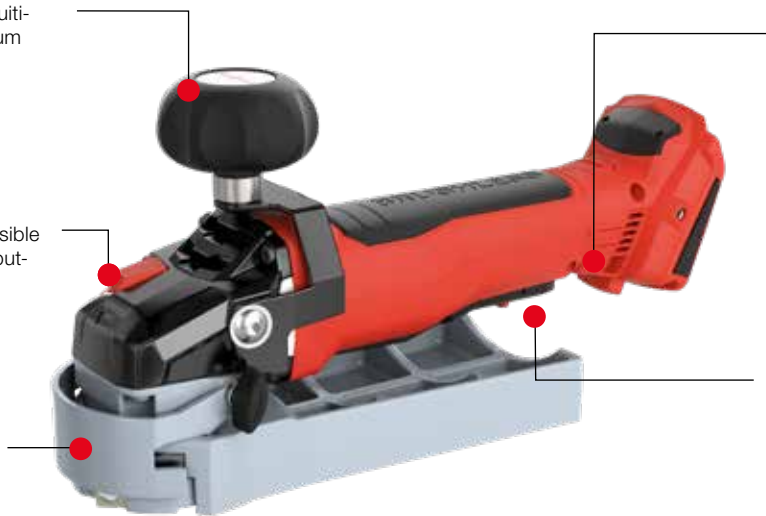

PF 80-18

The handle position enables intuitive handling and ensures optimum power transmission to the base plate.

The spindle lock is easily accessible by way of a top-mounted pushbutton.

The protective bonnet can be folded upwards without tools for flush milling.

The battery pack can be rotated in 90° increments for optimum ergonomics in any working position.

Ergonomically integrated - the paddle switch with dead man's function for safe handling.

Product features

- **Folding protective bonnet for flush milling**
- **Fast braking system for high user safety**
- **Portable CAS 18 V Li-Ion technology**
- **Optimum balance for clean and even work**

Application area

- Planing plugs and pellets used to repair knotholes and cracks
- Smoothing and flattening in restoration work and staircase construction
- For solid wood, hard wood and epoxy resin

Product description

The surface shaver PF 80-18 developed by MAFELL bears the quality seal of a product made in Germany. Thanks to outstanding quality and well-conceived details, you can depend on the MAFELL surface shaver.

The latest generation brushless motor is service-free and highly efficient.

The motor is equipped with a fast braking system for maximum user safety.

The electronic circuitry ensures great ease of use. It features smooth starting, a safety cutout in case the cutter gets stuck, and restart protection to prevent unintentional starting after a battery change.

Technical data

Tool diameter	80 mm (3 1/8 in.)
Nominal No. of strokes – no load	10.000 1/min
Dimensions W x L x H	160 x 316 x 162 mm (6 5/16x12 7/16x6 3/8 in.)
Noise level	90 dB (A)
Weight without battery	2,8 kg (6,2 lbs)

Delivery specification

Cordless surface shaver PF 80-18 PURE in MAX3	9M2102
1 Hose connector	
1 Pin spanner A35 DIN3116	
1 Screw driver T20
